## ATTENTION

Is called to Page No. 36 containing particulars of

## Oil Valleys, Ltd.

This is a Faber-McKenzie Syndicate. The only one of their four companies open to the public.

Our holdings are in

The Monarch Field Where crude oil has been struck

The Dingman Field The World-Famous Discovery Well

The McDougall-Segur Field Expecting to strike oil at any time

The Faber-McKenzie Field

Where the other Faber-McKenzie Syndicates will be drilling with eleven rigs around our holdings immediately.

In making these selections Messrs. Faber & McKenzie have been assisted by Mr. Ira Segur. These men are all developers, and it has now been proven that they know where to drill.

See inside of back cover.

## INTRODUCTORY

THIS work is compiled and published for the benefit of the general public, and is authentic in every respect.

The map shows the area of what is considered the proven field, but the fact that some companies have no holdings in the area shown on the map does not mean that the companies are not good or that their holdings are not good. Every authority who has studied the possibilities of oil in Alberta believes that the field, when finally proven, will include a much larger area than that shown on my map.

As the field is further proven by actual oil-producing wells, my map will be enlarged to include them.

This work will be revised as conditions require. All companies organizing or acquiring new holdings will oblige me by supplying me with the facts required, so that I can check the information taken from the official records and include them in the directory.
